

I oppose HR 4026 and strongly believe the FCC should reject NAB petition 04-160! I now have XM radio because I got tired of enduring the ramblings of the "shock-jocks" (the radio station DC 101 comes to mind) every morning just to hear the local weather. With XM, I can have the traffic and weather for the DC area in a matter of minutes and have the choice of listening or not listening to the "shock-jocks! If the NAB worries about someone taking the "local content" from them, maybe they need to re-examine their "local content"!

Thank you,
